

SUMMARY

Frontend-focused Full-Stack Engineer with over 4 years of experience in frontend development and backend integration, specializing in **React.js**, with supporting backend experience in **Python and Java/Spring Boot environments**. Key achievements include reducing reporting and analysis turnaround time by up to 80% through automation solutions at Nokia, and improving page performance by 40% as a freelance Frontend Developer.

EXPERIENCE

Full-Stack Engineer (R&D Engineer)

Nokia

06/2021 - 01/2026 Bangalore, Karnataka

A leading global technology company

- Designed and implemented automation and data-processing solutions using Python, SQL, and Hive in an Agile environment, reducing reporting and analysis turnaround time by up to 80%.
- Built and maintained automation pipelines integrating Python, Bash, SSH, and Linux-based systems to manage large-scale datasets and reporting workflows, assisting teams with reliable data delivery.
- Re-architected and optimized data validation applications using parallel processing in Python and Java, increasing execution efficiency by 25% while collaborating closely with teammates.
- Expanded existing ETL and automation components with Kubernetes-based deployments, assisting Agile sprint deliveries and enabling support for multiple new use cases.
- Fine-tuned Grafana dashboards and backend validation scripts using SQL and JSON to improve system health monitoring and data accuracy, supporting cross-team teamwork.
- Collaborated in cross-functional Agile teams (QA, infra, product) to design, test, and validate automation POCs, reducing manual effort by 30% through strong teamwork.
- Enhanced a Spring Boot API aggregator microservice by upgrading dependencies, resolving security issues, and expanding functionality while supporting existing endpoints.

Frontend Web Developer

Freelance

02/2018 - 05/2020 Hoshiarpur, Punjab

Freelance Web Developer

- Designed and built responsive frontend applications using HTML, CSS, JavaScript, and React.js for small business and individual clients.
- Enhanced usability and page performance by 40%, integrating 20 - 30 reusable UI components across 10 projects.
- Collaborated directly with clients to translate requirements into functional UI solutions.

EDUCATION

M. Tech - Computer Science Engineering

Punjab Engineering College

01/2018 - 01/2020

B. Tech - Computer Science Engineering

Indus International University

01/2014 - 01/2018

VOLUNTEERING

Volunteer Coding Team Leader and Mentor

Christel House India

06/2023 - 10/2024

- Led a volunteer coding team and co-created a curriculum for students.
- Mentored students and team members through live coding sessions.
- Coordinated sessions to ensure smooth and engaging delivery.

KEY ACHIEVEMENTS

Project Orion - Core Product

Developed core frontend for an AI startup product using modern technologies, enhancing application responsiveness and improving development speed significantly

PoC: Spring Boot & Swagger 3 Migration

Modernized a Spring Boot API aggregator through Swagger 3 migration, security fixes, and feature expansion.

SKILLS

React	Next.js	Node.js	SQL	Python
Java	JavaScript	HTML	CSS	Tailwind
PostgreSQL	ClickHouse	HiveQL	Git	
Linux	SSH	AWS	Digital Ocean	Regex
JSON	DNS	Kubernetes	Latex	Docker
Express.js	SpringBoot	Jenkins	Bash	
Grafana	MongoDB	ETL	Cucumber	
TypeScript	PHP			

PROJECTS

Project Orion - Core Product

01/2022

Core product development for an AI startup

- Owned and developed the core frontend using React.js and Next.js, implementing SSR, routing, and reusable UI components
- Integrated frontend with Node.js APIs, improving application responsiveness and reducing latency by 20%
- Styled and standardized UI using Tailwind CSS and shadcn/UI, increasing development speed by 30%

Analytics & Report Automation Suite

01/2021

A suite for analytics and report automation

- Automated large-scale performance reporting using Python, Hive, Linux, and SSH, reducing turnaround time by 80%.
- Improved data processing efficiency by 60% by designing workflows for datasets exceeding 1 million entries.

ClickHouse Deployment on Kubernetes

01/2023

Infrastructure project for deploying ClickHouse

- Deployed and configured ClickHouse on Kubernetes using custom Docker images on Linode
- Deployed workflows for 10 containerized analytics projects, optimizing deployment times by 30%
